

The graph displays monthly precipitation data. The y-axis is labeled 'Precipitation (mm)' and ranges from 0 to 400 in increments of 100. The x-axis is labeled 'Fecha' and shows months from November 2019 to June 2025. The data shows a highly variable pattern with several peaks and troughs. Notable peaks occur in late 2019 (approx. 350 mm), late 2022 (approx. 380 mm), and mid-2025 (approx. 400 mm). Troughs near 0 mm are observed in early 2020 and early 2024.
